IV. Lack of unity of invention
In response to the invitation to restrict or pay additional fees the applicant has: restricted the claims.
paid additional fees.
p additional fees under protest.
neither restricted nor paid additional fees.
2. This Authority found that the requirement of unity of invention is not complied with and chose, according to Rule 68.1, not to invite the applicant to restrict or pay additional fees.
3. This Authority considers that the requirement of unity of invention is accordance with Rules 13.1, 13.2 and 13.3 is
complied with.
not complied with for the following reasons:
This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.
Group I, claims 1 - 25, 36 and 38, drawn to a process for reducing cerebrospinal fluid flow obstructions.
Group II, claims 26 - 35 and 37, drawn to a kit.
The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the claims do not contain a special technical feature which contributes over the prior art. Specifically, kits comprising heparin (a clot reducing agent) are known in the art (see US 6146874 A).
4. Consequently, the following parts of the international application were the subject of international preliminary examination in establishing this report:
all parts
all parts.
the parts relating to claims Nos
